

Website Accessibility Services

Making your website accessible isn't just about meeting legal requirements—it's about creating opportunities to connect with a wider audience. The Web Content Accessibility Guidelines (WCAG) serve as the standard for achieving ADA compliance under the Americans with Disabilities Act, providing a clear framework for digital accessibility. At INT, we make sure your site complies with WCAG to ensure everyone can easily navigate and engage with your content. Our services help you reduce legal risks, improve user experience, and make your site inviting for all visitors. Whether you're building from the ground up or upgrading an existing site, we're here to make accessibility simple, effective, and inclusive.

Our Services

Basic Service: *Evaluation + Remediations*

Think of this as a quick tune-up for your site. We start with a free evaluation to see how accessible your site is right now. Then we take care of the fixes—like improving color contrast, adding alt text, and making sure your site works well with keyboard navigation. This is usually a one-time service, depending on the frequency and scale of updates you make to your site, with pricing ranging from \$250 to \$500 based on the complexity of the remediations needed. After we're done, your site will be set for long-term compliance and a better experience for all users.

Advanced Service: *User-Powered Customization*

Want to go above and beyond? Our Advanced Service adds a little extra magic with AI-powered tools that let users customize accessibility settings to match their preferences. Need a bigger font or color scheme with a higher contrast? It's all in your site visitors' control. We'll take care of the setup and then hand over the reins so your team can manage the tool and handle the annual subscription directly with the provider.

Pro Tip:

Combine both Basic and Advanced services for the ultimate accessibility powerhouse. We'll start by fine-tuning the backend with developer-level adjustments, ensuring your site is in top form. The advanced solution then takes things to the next level by enabling users to customize their experience to meet their needs.

Why Choose Us?

At INT, we believe that accessibility should be at the core of every website. Our team is dedicated to ensuring that your website is not only compliant with ADA and WCAG guidelines but also optimized to create a positive, inclusive user experience. With our expertise, we help you reduce legal risks, increase your reach, and deliver a seamless browsing experience for all visitors. Let us help you make your website welcoming to everyone.
